Connecting Health Care, Business, Government and Education to Our Fiber Optic Network and Data Center Infrastructure!
HealthNet connect, LC & BHC, LC
HNcBNc

Connecting Health Care, Business, Government and Education to Our Infrastructure

Mission
Our mission is to introduce and integrate business concepts and related technologies seamlessly within our client’s organizations. As a business partner and technology advisor we will provide the best services, support and infrastructure enabling our members to make a difference in the lives of the communities they serve.

Values
• Being a trusted & knowledgeable advisor to our communities on their broadband and technology needs
• Using our Infrastructure as our foundation
  - our privately owned 3,200+ mile fiber optic network
  - our HIPAA compliant Data Center Infrastructure
• Using proprietary tools, processes and trusted partners to guide our decisions
• Ensuring best in class service delivery & support for our clients
• Ensuring the best investments are made and are producing the highest ROI
• Being a “one stop shop” for our communities
• Being Community Focused
  - Bringing enterprise broadband and technology solutions to the communities we serve

Value Statement
We are focused on being trusted and knowledgeable advisors, using our infrastructure, tools and partners to deliver best in class service, produce the highest ROI and being a “one stop shop” to the communities we serve.
In 2007, UnityPoint Health created a business concept named “HealthNet connect” to provide a statewide fiber backbone network for the electronic exchange of health information. The statewide network would be the foundation for the health care industry to improve health care and lower costs by utilizing technology to facilitate the interoperability and information-sharing among health care providers, service organizations, vendors, and patients.

Today HealthNet connect is a robust eHealth Consortium with close to 200 hospitals and clinics across five states (IA, NE, IL, WI, MO). Our strategic benefit is our private fiber optic network. This electronic network has been built upon a robust, highly secure fiber backbone with the ability to extend through the mid-west and beyond.

HealthNet connect delivers unique benefits to its participants by providing:

• The most advanced eHealth, Broadband and IT solutions to participants under one company.
• A private fiber optic network that serves the mid-west with the capacity of a larger telecom network.
• A private, HIPAA compliant data center infrastructure built for participants for secure cloud and disaster recovery services.
• Full range of IT support and security services.
• Internet2 and National Lambda Rail for extensive education and medical research.
BHC, LC

In 2010 UnityPoint Health created BHC, LC, a communication and technology holding company to deliver services to the health care and business markets. The BHC, LC companies are HNc Services Inc. and BroadNet connect (HNcBNc).

HNcBNc offer tremendous opportunities to develop business, improve efficiency and lower costs by providing broadband communications and technology services to health care providers, business organizations, education and local government.

HNcBNc provides an expansive portfolio of solutions:
• Broadband Access and High Speed Internet over our Private Fiber Network
• Cloud Backup, Virtualization and Disaster Recovery through our Private Data Center
• Managed IT Support Services
• IT Infrastructure and Data Security Services
• eHealth Services

HealthNet connect and BHC, LC are backed by UnityPoint Health. With more than 30,000 employees and annual revenues of close to $4 billion, UnityPoint Health is the nation’s 13th largest non-profit health system and the fourth largest non-denominational health system in America.
2015 HealthNet connect Board of Directors

Pam Delagardelle, Chief Executive Officer
UnityPoint Health – Allen Hospital, Waterloo, IA

David Stark, President & COO
UnityPoint Health – Blank Children’s Hospital, Des Moines, IA

Brian Evans, Chief Executive Officer
Clark County Community Hospital, Osceola, IA

Michael Riesberg, Vice President
Iowa Radiology

Joy Grosser, Former Chief Information Officer
UnityPoint Health

Bill O’Brien, Vice President of Finance and Chief Financial Officer
UnityPoint Health Insurance and PPIC

Sheldon Ohringer, Founder and Former Chief Executive Officer
Caleris Inc.

John Hendricks, Chief Technology Officer
UnityPoint Health
Message from the Executive Director & CEO

I am very pleased to present the 2015 Annual Report. During 2015 we delivered on our goals of expanding the HealthNet connect Consortium and grow our BHC, LC companies, HNc Services Inc. and BroadNet connect (HNcBNc).

Through our management and administration of the Healthcare Connect Fund (HCF) grant we were able to extend our connections in Nebraska and Illinois while continuing to increase the size of our consortium to approximately 200 hospitals and clinics across five states in the Midwest making HealthNet connect one of the largest and more successful consortiums in the nation.

We formerly welcomed 7 of the 9 founding members of the RPN by connecting them to HealthNet connect. We also began the process of expanding our eHealth capabilities through Telehealth services, providing the infrastructure to several of our consortium hospitals.

HNcBNc continued to sign key customers and grow revenues in 2015 with 25% Y/Y top line revenue growth while simultaneously focusing on growing our team over 250%!

In 2016 we will have a laser focus on growing revenues in HNcBNc, expanding our HealthNet connect footprint through the effective management and administration of the HCF grant and solidifying our eHealth capabilities through expanded Telehealth services and developing our private Health Information Exchange.

Our commitment and focus on the communities we serve is unwavering and we will continue to deliver the best solutions using the best infrastructure and providing the best support!

Rodney Brown, Executive Director & CEO
2015 Key Accomplishments

Widening the HealthNet connect Consortium

Last year we announced a very strategic expansion in Nebraska and Illinois. During the past year we began physically connecting those sites to our fiber network. We completed the following connections:

**Nebraska**
- Bryan Health
- Fremont Health
- Great Plains Health
- Columbus Regional Health

**Illinois/Iowa**
- Community Health Care, Inc.
- Hammond-Henry Hospital
- Mary Lanning Healthcare
The Clinton IA Community Health Center is one of several Federally Qualified Health Centers (FQHC) that are part of the HealthNet connect Consortium.

HealthNet connect has partnered with these clinics to provide high speed broadband so they can have the same advantages as larger clinics and hospitals relative to health information exchange. As you can see from the picture above the employees at the Clinton Clinic were excited about having a fiber connection!

FQHC’s are critical to their communities providing high quality, low cost health care services. In order to do this effectively they require the same tools as their larger counterparts.
New Clients to HNcBNc

Even while most of our focus was on growing our team to ensure we continue to provide our clients the very best service delivery and support, we were still able to sign several very key customers throughout our regions.

In our HNc Services business some of our key signings were: Madison Women’s Health in Madison, WI, June Nylen Cancer Center in Sioux City, IA and Columbus Community Clinic in Columbus, NE.

On the BroadNet connect side, some of our key signings were: Rockwell Collins in Cedar Rapids, IA, CBE Companies in Cedar Falls, IA and Alamakee-Clayton Electric Cooperative in Alamakee, IA.

These are just a few of our new to clients. Every client is special to us and we will continue our commitment to ensuring all our customers receive the best value and have a great experience.
HNCBNc Revenue Growth

Growing revenues is vital to our sustainability. In only our 3rd full year of operations we have grown our revenues over 100% from year 1 to year 3.

HNCBNc Revenue

2013, $1,500,000
2014, $2,600,000
2015, $3,200,000

Revenue
Expansion of Our Team

Growing our participant and client base mean we have to ensure we have a talented team to deliver best in class services and support. 2015 saw HNcBNc expand our team over 250%. We added key staff in service delivery, support, business development and eHealth.

In addition to growing our staff, we added new board of director members for both HealthNet connect and BHC, LC and its subsidiaries.
2016 Strategic Initiatives

Growth through the Healthcare Connect Fund

Stephanie Young, Director of Operations

HealthNet connect released its Expansion Initiative by adding participants to its consortium under the Healthcare Connect Fund (HCF) program. The HCF program was created to provide discounts for high-capacity broadband connectivity for eligible health care providers (HCPs) which is resulting in the formation of state and regional broadband HCP networks. Under the program, eligible not for profit and/or rural HCPs are receiving a 65% discount from the fund on broadband and internet services. The HCF is an ongoing program in which HealthNet connect has already received multi-year contracts to continue expanding high-capacity broadband based services to its consortium participants through 2017.

There are 3 phases to the HealthNet connect Expansion Initiative. Phase 1, which was successfully completed in 2015, added new expansion into Nebraska by connecting 8 hospitals that are part of the Nebraska Regional Provider Network (NE RPN). In addition to this growth, HealthNet connect also connected 4 IL hospitals and 3 additional Iowa clinics. The remaining 2 phases of the HealthNet connect Expansion Initiative are currently under way through middle of 2017, providing HCF discounts for high speed broadband connectivity to more than 60 hospitals and clinics throughout the states of NE, IA, WI, and MO.

The HealthNet connect Expansion Initiative will result in a substantial increase of participants that originally started at just 78 participants to close to 200 participants by end of 2016. This expansion and growth will allow additional group discounts on value added services in addition to expanded Health Information Exchange capabilities to our Consortium.
2016 Strategic Initiatives

Development of eHealth Capabilities

Calvin Heller, Director of eHealth

HealthNet connect will continue its transformation into the most innovative eHealth Consortium in the nation by developing and expanding Telehealth and developing a private Health Information Exchange (HIE). The original goal for establishing HealthNet connect and other similar consortiums across the nation was to build a foundation for robust delivery of care at a distance and the ability to exchange medical information. HealthNet connect provides a better infrastructure than any other consortium in the nation to do this, in addition to being independent, flexible and nimble.

Telehealth:
HealthNet connect will serve as a “Telehealth Resource Center” (TRC) for the participants of our consortium. Through a strategic partnership with UnityPoint Clinic, HealthNet connect will provide clinical and administrative tools, processes, education and technology to our participant hospitals/clinics who are actively providing or have interest in providing care at a distance. We will use our technology-enabled health care deliver model to connect specialists with patients and primary care providers.

Private Health Information Exchange (HIE):
HealthNet connect will set up a Private HIE providing our participants the ability to securely exchange key patient information within the consortium. Through our HL7 communication interface engine our participants will be able to easily and securely send patient information—such as laboratory orders and results, patient referrals, or discharge summaries—directly to another health care professional within our Consortium. This form of information exchange will enhance coordinated care with benefits to both providers and patients.
HNCBNc Focus on Communities

HNCBNc will continue to have a solid focus on our communities. Our belief is if schools, healthcare providers, local government and businesses are all connected via high-speed broadband and leading edge technology, they will be able to provide beneficial services to the people of their communities and therefore have a positive impact on their lives.

HNCBNc will continue to build out broadband infrastructure in our communities and provide cost effective services over that infrastructure. Our goal is to bring these communities closer by linking education, healthcare, business and local government so there is availability of technology and a robust exchange of secure in information and knowledge.
